

Distributor Opportunity

High-Performance Windows for Australia's New Energy Standards

Australia's construction industry is changing rapidly.

With the introduction of **NCC 2022 and mandatory 7-Star NatHERS energy ratings**, builders are under increasing pressure to deliver homes with higher thermal performance and energy efficiency.

Windows and doors are now one of the **most critical components influencing a home's energy rating**.

Many conventional aluminium window systems struggle to meet modern energy requirements without expensive glass upgrades or design compromises.

Astral Windows was developed to help solve this challenge.

What is Astral Windows?

Astral is a high-performance window and door system engineered to support modern Australian building standards.

These include:

Thermal Break Frame Technology

An insulating barrier separates internal and external aluminium sections, significantly reducing heat and cold transfer.

Astral combines:

- advanced thermal break technology
- high-performance glazing options
- modern sealing systems
- premium hardware systems

These elements work together to improve:

- thermal insulation
- air infiltration resistance
- weather performance
- acoustic performance
- overall building energy efficiency

Why Become an Astral Distributor?

Demand for high-performance window systems is growing rapidly across Australia.

This growth is being driven by:

- stricter energy efficiency regulations
- rising energy costs
- increased consumer awareness of building performance
- demand for sustainable housing

Astral distributors are positioned to participate in this growing market by supplying window systems designed for the **next generation of Australian homes**.

A Simple Supply Model

Astral has been designed to simplify the supply of high-performance windows.

Rather than requiring complex fabrication infrastructure, Astral windows are supplied as **complete turnkey systems**, fully fabricated and glazed.

This allows distributors to focus on:

- quoting projects
- builder relationships
- project management
- installation services

The Astral Product Range

Astral offers a complete range of systems designed for modern residential and architectural applications.

Commercial-grade aluminium double-glazed system for durability and cost-effective projects.

Thermally broken aluminium system delivering improved energy performance.

Premium architectural system with exceptional thermal performance.

Timber-aluminium composite system combining natural timber with durable aluminium.

Engineered in Australia for Australian Conditions

Distribution Strategy

Astral is expanding its distribution network strategically across Australia.

Rather than saturating markets with multiple resellers, Astral partners with a **limited number of strong regional distributors**.

This allows distributors to:

- develop strong builder relationships
- grow their market presence
- participate in the growing high-performance window sector.

Distributor Support

Astral provides partners with the knowledge and tools required to succeed.

Support includes:

- product training
- technical documentation
- specification guidance
- installation support
- marketing materials.

Become an Astral Distributor

Australia's building industry is moving toward a future **where energy efficiency and building performance are central to every project**.

Astral Windows has been developed to help meet these expectations by delivering high-performance window systems designed for modern Australian homes. We are currently expanding our distribution network and are seeking strategic partners in key regions.

If you are interested in becoming an Astral distributor, we invite you to contact us to discuss the opportunity.
